Next-Generation Buprenorphine Analgesic

Relief that lasts. Research that matters.

epicurpharma.com

The new gold standard in lab animal pain relief.

Small volumes • Ease of injection • Lower viscosity

Epicur's new long-acting Buprenorphine ER analgesic is specifically formulated for research rats and mice, developed with input from laboratory animal veterinarians, scientists, research personnel, vivarium directors and distributors across North America and Europe.

- **cGMP-compliant manufacturing**
- **72-96 hours of relief**
- **Up to 6-month shelf life**

Advanced pain relief for lab rodents

 **Labor-saving**
fewer interventions

 **Optimized viscosity**
compatible with small-gauge needles (27-30G)

 Validated for **72+ hours of action**

 **Compatible with most research protocols**
involving post-op and post-procedure pain

 **Extended shelf life**
fewer reorders, reduced waste

 **Regulatory-driven**
enhanced pain mitigation

 **High-protocol compliance**
reduced error margin & pharmaceutical waste, improved regulatory compliance

Breakthroughs shouldn't be delayed.

Order our longer-lasting buprenorphine for your lab or facility today.

The Epicur Pharma® Advantage

We offer one of the largest selections of 503B manufactured drugs that are traditionally compounded for animal health among currently registered 503B facilities nationwide. Every drug manufactured by Epicur meets FDA standards.

- **100% manufactured medications** following FDA-enforced regulations
- Medications are verified through **stability and sterility testing**
- **Longer expiration dates** than 503A compounded medications

503B FDA Registered
Outsourcing Facility
